# JULIA HANARD

## ASSOCIATE FRONTEND ENGINEER

✉ julia.hanard@gmail.com  💼 https://julianoiret.github.io/portfolio/  in Julia Hanard

I am a passionate Frontend Engineer with a creative mindset, based in Sydney.

As a recent career changer, my dedication to coding brought me to undertake a web development bootcamp - Le Wagon Melbourne. Throughout this tech journey, I developed a strong interest in front-end development with a focus on the user interface and experience.

I am currently working at REA Group, ranked one of the best places to work in Australia and one of the best workplaces for women. I have been selected for the Springboard to Tech program where I had the opportunity to learn and work within a large range of tech stacks such as Typescript, React, GraphQL, Kotlin, Scala, AWS & more, through two rotations, in 12 months, before joining a permanent full-stack team. I worked on large projects, for both consumer and customer sides, such as realEstimate™, inspection registrations, etc.

Committed to my professional growth, I approach my career with a dedication to continuous learning.

## TECH EXPERIENCE

### ASSOCIATE DEVELOPER
REA Group

2023 - Present

### ASSOCIATE DEVELOPER - SPRINGBOARD TO TECH PROGRAM
REA Group

2022 - 2023

- Build UI components using TypeScript, React, styled-component, testing library, and APIs using NestJS, TypeScript and REA's intern tools for realestate.com.au and ignite.realestate.com.au
- Write, maintain and improve code
- Review and provide feedback on pull requests
- Ship a native project within 2 weeks using Kotlin and GraphQL - with a team of Grads and Springboarders
- Work on pair-programming and independently, in an Agile environment
- Additional technical expertise includes working with JavaScript, Scala, AWS, and Docker

## PROJECTS

### REACT PLAYLIST (2022)
React - JavaScript - styled-component - Testing Library - Git- Github - Figma

**https://react-playlist.netlify.app/**

- Designed, implemented and shipped to production a React web app
- Dark/Light mode using `theme`
- Testing with Jest and Testing Library

### CATSTRONAUT (2022)
GraphQL - React - Git - Github - Heroku

- Boosted my developer skills with hands-on GraphQL tutorials and trainings - Apollo Odyssee
- Live data, resolvers & update data with GraphQL mutations

### MOUNTAIN MAP (2021)
Ruby on Rails - JavaScript - SCSS - PostgreSQL - Mapbox - Turbo - Stimulus - Bootstrap  - Git - Github - Heroku

- Designed, implemented and shipped to production a Rails prototype of a web application in a team of 4 people in 2 weeks
- User authentication via Devise

### MULTI REACT PROJECTS (2021)
React - JavaScript - CSS - SCSS - Git - Github

- Strengthened my React proficiency by initiating and completing several projects from scratch, using React
